Microsoft Partner Network
Programs Guide

Updated: November 12, 2020
Programs Guide

The Microsoft Partner Network is your entry point for partnership with Microsoft and with other partners. Whether you offer applications or services, our portfolio of programs, resources, and offers will help you:

- Grow your business by accelerating customer acquisition and value with increased visibility through improved selling experiences and new offers;
- Drive customer success and increase efficiency with new platform and tooling improvements;
- Differentiate your business so customers understand your areas of expertise and specialization.
Introduction to the Microsoft Partner Network

This guide is intended to provide partners who purchase a Microsoft Action Pack or attain a competency with an overview of Microsoft Partner Network program rules and benefits. Benefits are provided to partners once they meet the eligibility criteria and purchased the appropriate offer.

Program Administrator

An administrator within a partner organization collaborates across their organization to manage Microsoft Partner Network membership including enrollment, offer purchase, competency attainment, and benefits assignment to specific users within the organization. **Partners participating in the Microsoft Partner Network are responsible for tracking use and consumption of licenses and services provided through the program. Partners are also accountable for developing their own method of tracking license/benefit usage.**

[Review guidance about managing your membership.](#)

Refund requests for competency and/or Action Pack fees should be raised within 30 days of initial purchase. Refund requests are subject to a review and will be considered if no Benefits were consumed or tokens viewed. Microsoft reserves the right to refuse the refund.
Program Benefits
Technical Presales and Deployment Services

Technical Presales and Deployment Services offer technical guidance based on real-world scenarios via interactive webinars and personalized technical consultations. These services help partners accelerate development, deployment, and sales of Microsoft cloud-based applications and services. Partners must be active members of Microsoft Partner Network. Access to services varies depending on the type of engagement partner wishes to have with a Microsoft partner technical consultant. Additional information available in Using Technical Presales and Deployment Services.

Product Licenses Terms of Use

Some programs and offers in the Microsoft Partner Network include product licenses that are intended to help partners build innovative Microsoft-based apps and services. Refer to the license tables linked below for the current license grants for these programs and offers. The product licenses you will receive are what’s listed in Partner Center at the time you meet requirements and/or pay the fee.

- License table for partners with a Microsoft Action Pack
- License table for partners with a Competency

Each partner is responsible for tracking the consumption of software and cloud services license entitlement. If a partner organization is selected for a compliance audit, that organization is responsible for presenting records regarding the active program licenses used and compliance to the terms of use. Licenses do not provide downgrade rights or any other Software Assurance services. If you need deployment, management, and other similar services, learn more about Software Assurance.

Product Licenses granted can be used for:

- Demonstration purposes. Sales and marketing employees of the organization can use this software to showcase products to your customers, but demonstration products cannot be installed on customer hardware or infrastructure and must be used with partner supervision.
- Solution/Services development purposes, including the development, testing and demos of solutions and services.
- Internal Training can be used for training internal employees only. Use for customer training is not permitted.
- Product licenses for internal use, in a development, test, demo, sandbox, or production environment for general internal business purposes and not for any type of commercial purpose.

Product Licenses granted to partners cannot be used for:

- Direct revenue-generating activities such as hosting a customer’s applications or development of custom solutions for a specific client
- Employee personal use at home
• Installation of solutions or services at a customer site
• Customer training (except for learning partners)
• Resell or transfer to any third party

**Product Keys and Tokens**

Some products and cloud services require a product key for installation and/or activation. Product keys for cloud services may also be referred to as tokens. Keys are issued per organization and not per end user of the organization.

Not all product and cloud services licenses require product keys for installation or activation. Partners can use any combination of methods and keys they have acquired through various Microsoft programs to activate machines, depending on their business and infrastructure needs, so long if the systems are properly licensed and appropriate use rights are applied.

**On-premises Software Installation and Activation**

If a product requires a product key for installation, the end-user will be prompted to enter a product key during the installation process. If a product key is not required, “Not Required” will be noted in the Product Key column.

Although some products require the entry of a product key during the installation process, not all products require product activation. Product activation is required for Windows server and client operating systems and all Microsoft Office client applications.

Some product keys issued are Multiple Activation Keys (MAK). These products have finite number of installations, activations, or seats. A product key will stop working when all installations and activations have been consumed. Additional activations for these product keys will not be granted. Consumption behavior of activations on a product key differs between partners with an Action Pack and partners with a competency:

For the Microsoft Action Pack, the product key activation behavior is based on scenario:

• If the software is installed on a new machine, one product activation is consumed against the product key.
• If the software is installed on the same machine with no significant hardware changes, product activation is not consumed against the product key.
• If the software is installed on the same machine with significant hardware changes, product activation is consumed against the product key.

For partners who attain a competency, each time a machine is activated, one of the product activations for that product key is consumed. This includes situations in which the same machine is reimaged and activated. Product keys may only be used in the license grant combinations as provided. For example, one 25 seat key cannot be adjusted to 5 different 5 seat keys.
On-premises software licenses issued are not perpetual. Partners are entitled and have the right to use these licenses only during their membership. Partners who opt not to renew their Microsoft Partner Network membership will need to obtain license rights via **Commercial Licensing** or uninstall any on-premises software obtained via the Microsoft Partner Network.

**Cloud Services Activation**

Tokens are issued for cloud services. Partners may have multiple tokens for each online service. Tokens must be used in the format provided. For example, a 25-seat token cannot be split into 5 different 5 seat tokens so that the cloud service can be consumed under different tenants. **Program administrators who manage benefits must pay close attention during activation, because each token may only be activated one time. Once a token has been activated for seats on a tenant, those seats may not be moved to** another tenant.

The issuing of replacement tokens will be considered within 30 days of activation and is subject to review by Microsoft. If authorized upon review, replacement tokens will be issued as a one-time exception. **Microsoft reserves the right to refuse the issuance of tokens.**

Use rights for cloud services subscriptions terminates at the end of Microsoft Action Pack subscription or at the end of a competency enrollment year. **Although Partners may continue to have access to cloud services past their program enrollment end date, they will no longer have use rights through the program.**

Each year when an organization renews a subscription or re-enrolls into the subscription/program with a competency, a new set of tokens will be issued based on the organization’s entitlement at the time of reenrollment. Partner program administrators are required to enter these new tokens on the Key Redemption Portal each program year to avoid a lapse in cloud services. Partners who opt not to renew their membership will need to obtain license rights via **Commercial Licensing.**

**Visual Studio – Developer Tools**

Visual Studio Enterprise subscriptions are included with certain competencies. The Microsoft Action Pack subscription includes Visual Studio Professional subscriptions. All Visual Studio subscriptions are licensed per user and must be assigned and activated to be valid.

Sharing sign-in credentials is prohibited.

**Visual Studio subscriptions** allow designated employees in the partner organization to use the software and cloud services included within the Visual Studio subscription to design, develop, test, and demonstrate internal applications.

The products included in these Visual Studio subscriptions cannot be used for direct revenue-generating activities, such as providing consulting services, customizing a packaged application for a specific customer, or building a custom application for a customer, for a fee. They can be used for indirect revenue-generating
activities, such as building a packaged application on the Microsoft platform, which is then marketed and sold to customers.

**Assigning subscriptions**
Visual Studio subscriptions may be reassigned from one subscriber to another if 90 days have passed since the time of the original assignment.

**Sharing**
License entitlements are defined per organization. Your organization can share licenses across your associated locations. Partners cannot share licenses across separate organizations including affiliates and acquired companies that are not associated within the MPN membership profile of the partner who has Product License rights.

**Azure Services Benefits**
Partners may be eligible for either monthly or bulk credits, based on the competencies they attain.

- Monthly Credits – Learn more here: [Azure Benefit for Microsoft Partner Network](#)
- Bulk Credits – Learn more here: [Microsoft Azure Sponsorship Offer Details](#)

**Technical Support**
As part of their Microsoft Partner Network benefits, partners receive two types of tech support incidents: Product Support Incidents and Signature Cloud Support (SCS) Incidents. While competency partners have access to both tech support incidents, Action Pack partners have access to product support incidents only.

Product Support Incidents are subject to N-1 policy (see [MPN Partner support N-1 policy for on-premises products](#) for policy details). The N-1 support policy enables only newer on-premises products. N-1 includes the current product (N) and the previous product version (N-1). Older (N-2) products and any product where mainstream support has ended (see [Microsoft Lifecycle Policy](#)), are not covered by Product Support Incidents.

Signature Cloud Support provides partners with cloud support to help keep their customers' services operating smoothly. Signature Cloud Support handles technical support scenarios for Microsoft Office 365, Microsoft Dynamics CRM Online, and Microsoft Azure. You can find out more in [Microsoft Partner Network technical benefits summary](#).

**Go-to-Market Services**
Go-To-Market Services is a portfolio of best-in-class marketing content and programs that help you accelerate time to market, drive demand, and expand your business. We operate at a global scale in over 170 countries and 14 languages, empowering you to unlock new growth opportunities for your business and leverage our vast ecosystem. Go-To-Market Services are included in your partnership with Microsoft. As a
partner with a silver or gold competency you unlock additional benefits and the opportunity for purchasing incremental marketing solutions designed to take your business to the next level.

Learn more or get started.

**Note:** Benefits swap from Microsoft Action Pack to Learning Action Pack, or vice versa, can be performed one time only, within 30 days after the Action Pack has been purchased, and if no benefits were consumed or tokens viewed. The benefits swap is subject to a review. Microsoft reserves the right to refuse the benefits swap operation.
